Battle of Gods

Introduction to the Game

Introduction

Battle of Gods [BOG] is a Mythoverse designed to create an ancient world experience for its members. A world where the ancient Gods from different mythologies exist and battle themselves.

BOG is a **Play-To-Earn** game meaning that players can earn by playing the game. Defeat the other players to win the game and get rewarded with **FrogDog** tokens – the game currency of our Mythoverse. There are several types of assets available in BOG: Gods, Relics, Artifacts, Treasures and also in-games businesses like Blacksmith and Alchemist as well as Land Plots. All these are tradeable, transferable and truly owned by the player in the form of NFTs.

Generate passive income without having to play the game just by owning these **NFTs** .

BOG will initially run on **Phantasma**, an ultra fast and affordable Layer 1 Blockchain, specifically crafted for web 3.0 Games with its Smart NFT technology and architecture.

Phantasma

The Ultimate Layer 1 for Gaming

Why Phantasma?

FrogDog Games is revolutionizing board game development by combining the power of blockchain technology, the **Phantasma Layer 1 Gaming NFT blockchain**, and a proprietary card game engine on Unity. Our vision is to transform traditional board games into immersive and digitally enhanced experiences.

Phantasma is a high-performance, interoperable blockchain ecosystem tailored for developers and gamers. It offers a suite of advanced tools and features, including **infinite side-chains** with **5.000 TPS**, **oracles**, **DEX** (Q3 2023) a native hub and **DAO** smart contracts, along with a voting system, empowering developers to craft immersive experiences.

Phantasma is also the first and only blockchain to use **Smart NFT** technology, the next generation of NFTs.

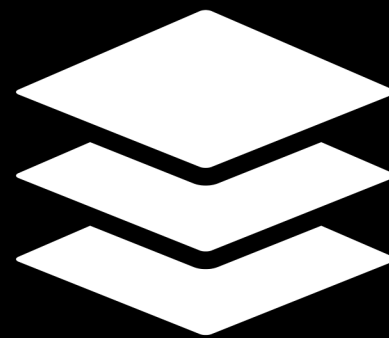

Smart NFTs

The next generation NFTs

3

Multi-Layer

Made from a group of smaller NFTs which all put together create a bigger and functional NFT.

On-Demand

Mint NFTs on demand as users buy them, eliminating the need to create vast amounts of NFTs in advance.

Timing

Enables game developers to give player a free, limited time access to their games.

Nesting

Allows for the infusion of an infinite number of NFTs into another NFT.

4

Gods and Creatures

In order to play the game one must recruit Gods from the temple. These Gods are part of a mythology which shares special traits and abilities that are inherent to it.

Location and Items

Explore Bazaars, Market, Temples, Shrines and other locations in this world.

Items consist of relics, treasures and artifacts that can be equipped on the characters.

Private Guilds

Players can join or create their own private guilds and fight against others in Battle of Gods in a team vs team mode.

FROGDOG Token

"One token to rule them all"

FrogDog Token [FDT]

The Battle of Gods blockchain governance falls under the umbrella of the FrogDog Digital Game Studio and it is represented by its own token - "FROGDOG Token [FDT]", the governance token for all Frog Dog studio's original games, including Battle of Gods.

FrogDog Tokens are required to play the game in *Battle Mode* where the players and their Gods battle for victory. After each game players collect their prizes and earn points to improve their ranking in the Battle of Gods *Leaderboard*. Daily, weekly and monthly prizes are awarded to players and guilds according to their ranking.

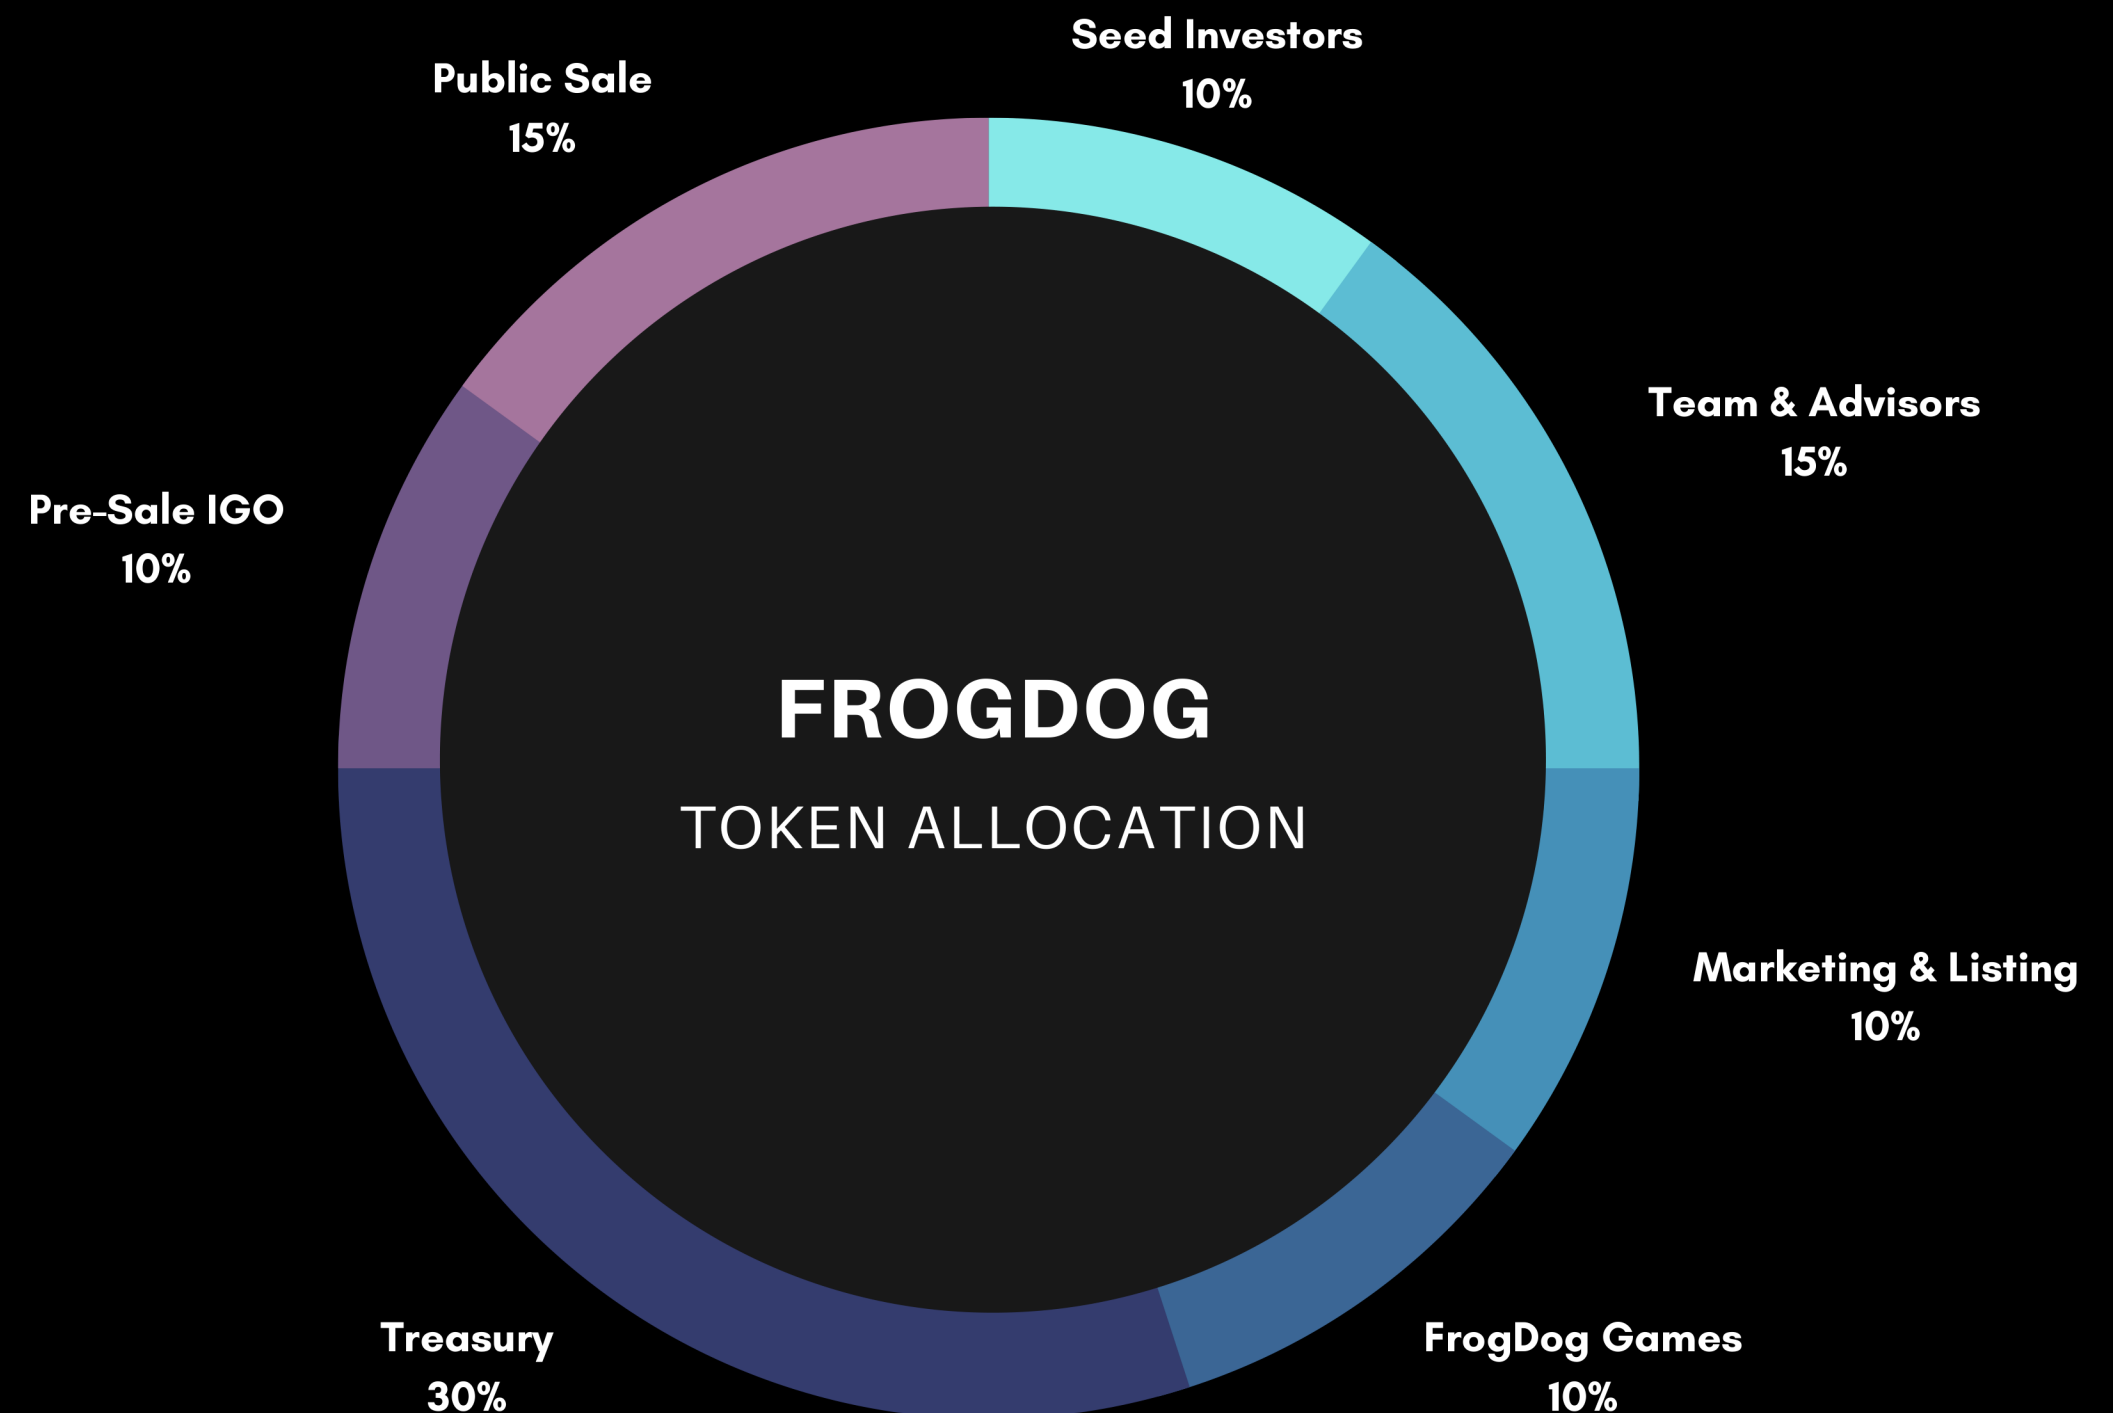

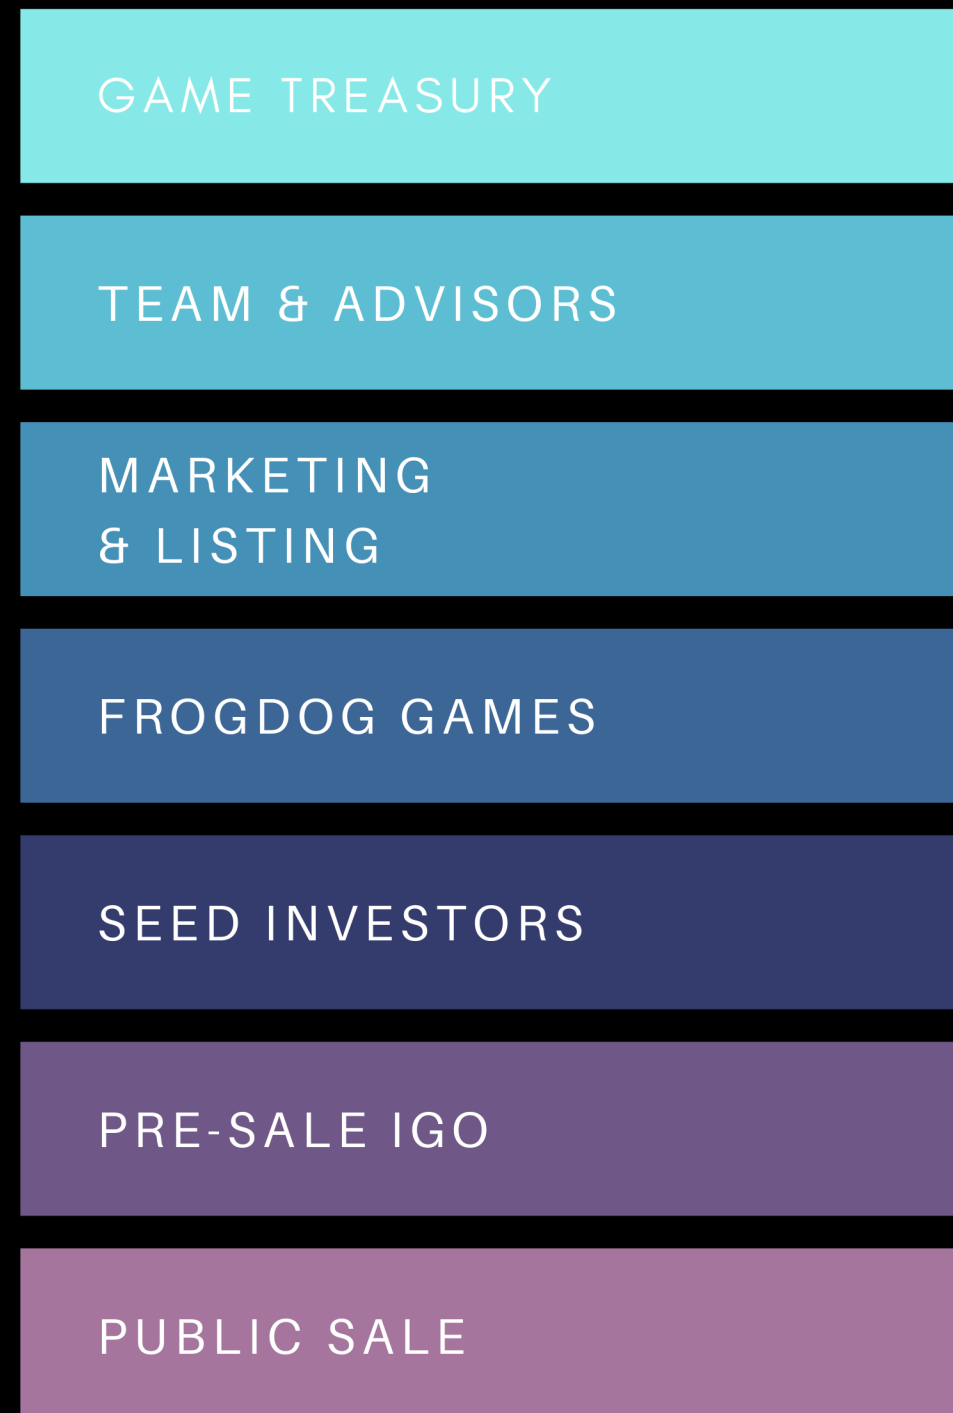

FrogDog Tokens total supply is 999,999,999 tokens. The owners of FDT will be able to stake their tokens and receive rewards.

Gods Above (2024)

399.999.999 FDT Unlock

Guild Wars (2025)

99.999.996 FDT Unlock

FROGDOG Token

How to earn FDT

Frog Dog Token [FDT]

During **Phase 1** each **FrogDog Token** will generate **0.00009 FDT/day**. A minimum of **100 FDTs** must be staked to be eligible. Investors who stake **500,000 FDT** or more join the ranks of the **GUARDIAN FORCE** and receive additional staking rewards, amongst other perks.

On **Phase 2** the staking rewards will gradually progress from **FDT** only to a mix of **USDT** and **FDT**.

With **Phase 3** all rewards will be paid in **USDT** to reduce the sell pressure on the token and help improve its value.

Asides from staking, **FrogDog Tokens** can also be earned by owning:

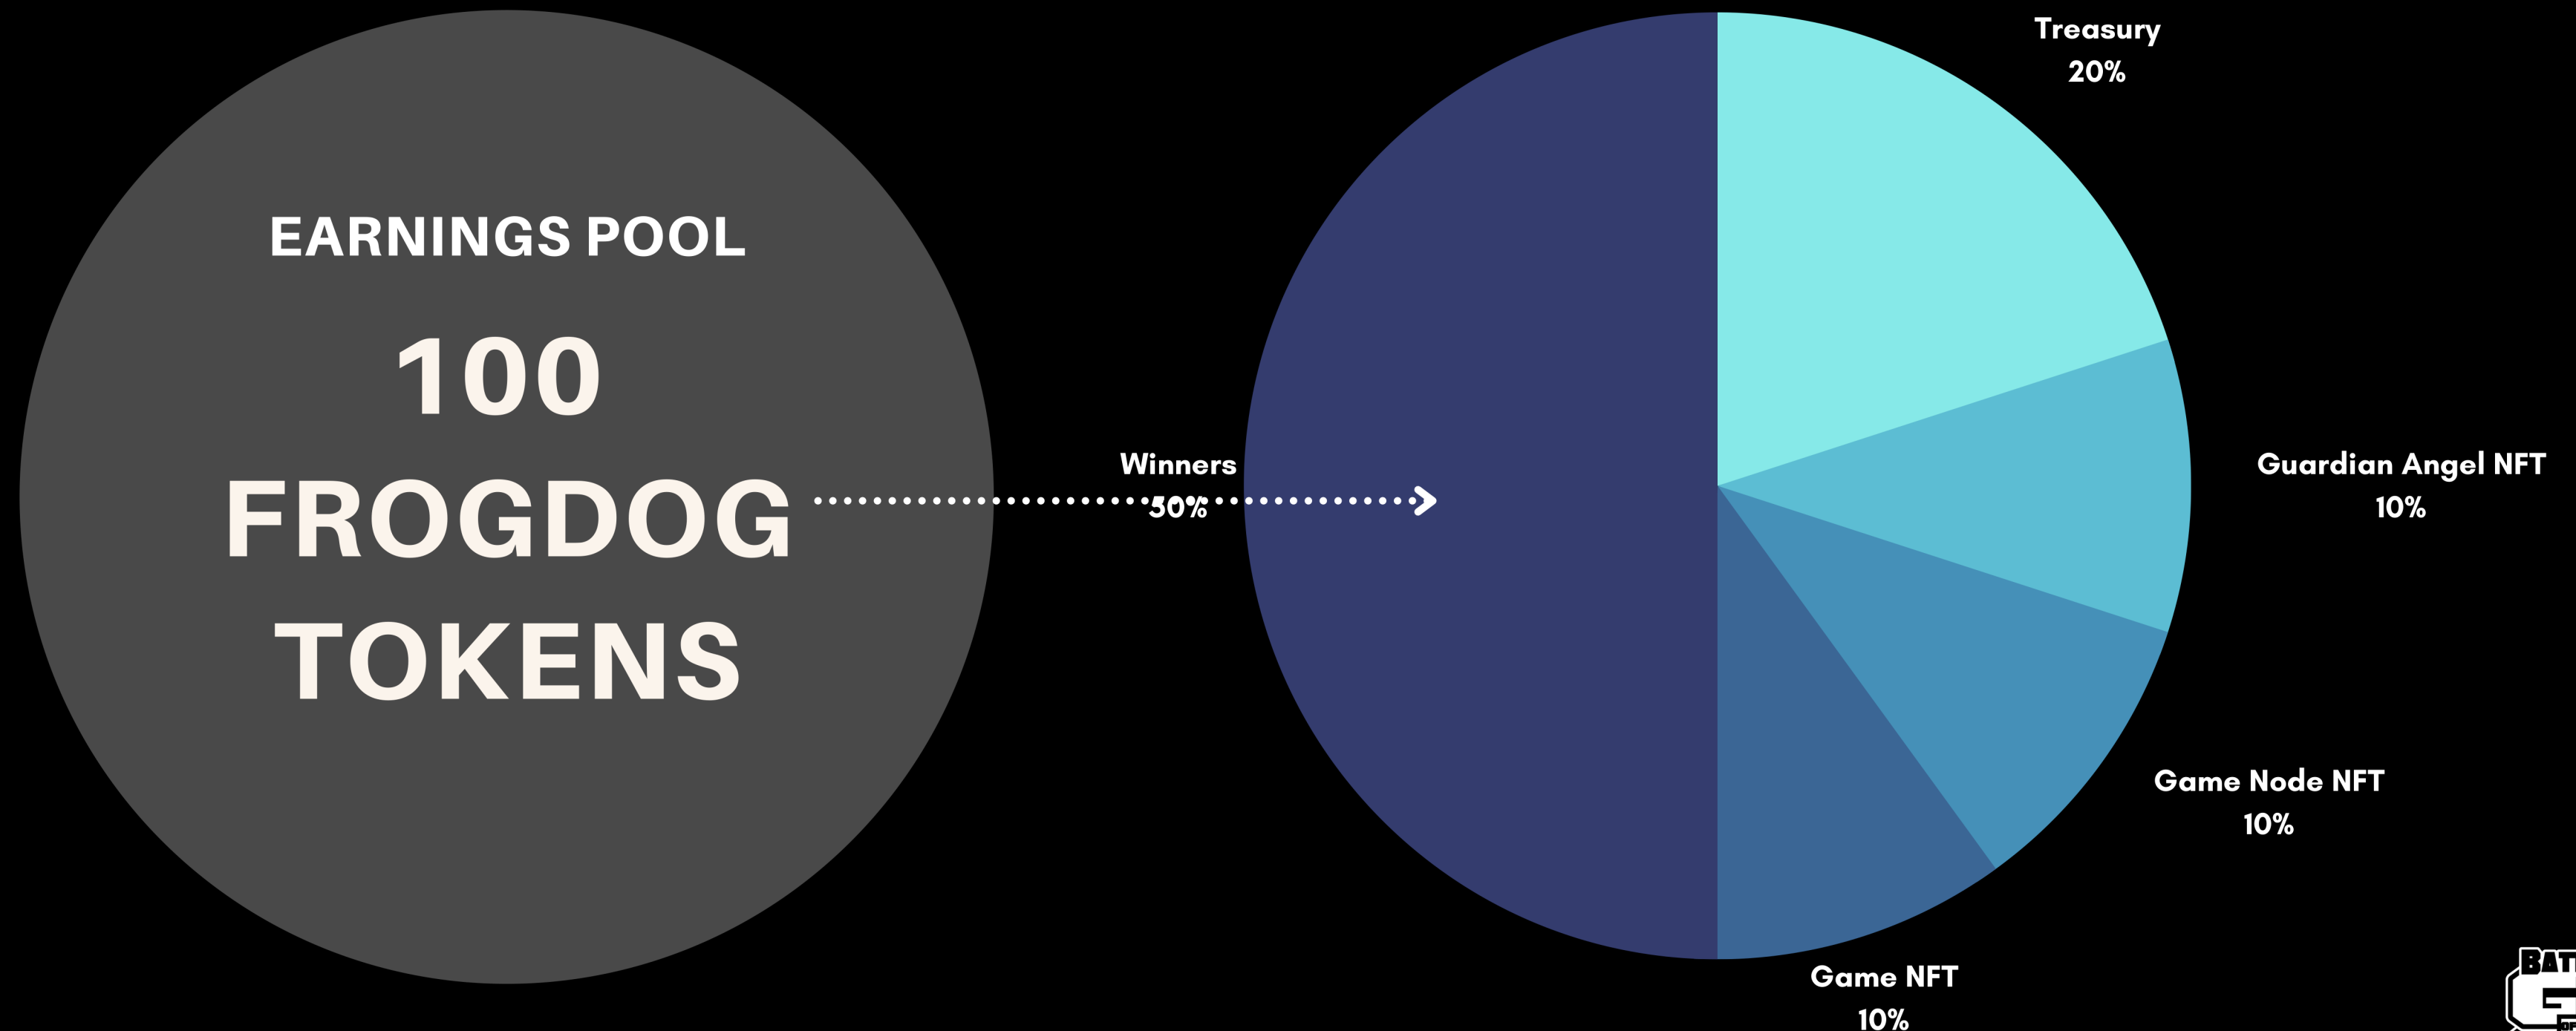

1. **Guardian Angel NFTs** - The most rewarding NFTs, collects 10% from **ALL** played games.
2. **GameMaster Nodes** - Collect 10% fee from all played games in that node.
3. **Game NFTs** - Earn passive income every time the owned NFTs are used within any game instance.

Karma Points [KP]

From the ground up, Battle of Gods was built with a very inclusive philosophy where everyone is welcomed and anyone can play the game with no initial investment required, a true, **Free2Play**, **Play2Earn** and **Fun2Play** game.

Any player that wants to participate in *Battle Mode* and doesn't own any **FROGDOG** Tokens can still do so by earning **Karma Points**. To do so, players must either become members of our **Frogdog Army** and promote the game awareness or play the game in *Explorer Mode*, where they can search for relics, artifacts, shards, etc. These items can be traded at the *Marketplace* and *Bazaar* for **Karma Points**.

When enough **Karma Points** have been accumulated, the player will be considered "worthy" by the Gods and will be awarded a free ticket to join *Battle Mode* and potentially earn **FROGDOG** tokens.

Highlights and Key Points

12

Beautiful Mythology Art NFTs

The artistically designed collection of NFTs of different mythologies will captivate the interest of serious collectors all over the world.

Fun2Play, Play2Earn and Free2Play

Free to play completely eliminate the entry risk for everyone. The possibility to earn by playing a fun and multi-dimensional game will serve as a serious incentive to play the game, which allows for massive network effects.

Earn Passive income in 3 different ways

This innovative approach allows for the possibility to earn passive income in 3 different ways: NFTs, Game Nodes and Staking BGODS.
